EU Mission Restore our Ocean & Waters

The Missions will work towards meeting the follow goals for 2030:

- **Protect and restore marine and freshwater ecosystems** and biodiversity, in line with the EU Biodiversity Strategy 2030
- **Prevent and eliminate pollution** of our ocean, seas and waters, in line with the EU Action Plan Towards Zero Pollution for Air, Water and Soil
- **Make the sustainable blue economy carbon-neutral and circular**, in line with the proposed European Climate Law and the holistic vision enshrined in the Sustainable Blue Economy Strategy

Four "lighthouses"

These four basins were initially matched with one of the three mission goals.

However, this is less pronounced in the current phase of the mission implementation.

En ny "upscaling phase" från 2025.
